Normative data to be used by agencies in determining eligibility for Sound System Disorder as described in the Missouri State Plan for Special Education, December 2013, Part B, page 26. Norms are based on the Nebraska Replication of Iowa Norms (Journal of Speech and Hearing Disorders, Volume 55, 779-798, November 1990, Table 7, page 795), adapted to provide a common age norm for both females and males.
